Publishing and liability

This guide includes relevant sections from the acknowledged groups, but also includes new information from current learning by the Construction Project Information Committee (CPIC) and the British Standards Institute (BSI) on a number of recent projects.

This information is published as guidance of a general nature, and the author accepts no liability for any use to which it may be put.

This is a preview. Click here to purchase the full publication.

Acknowledgements

Production Information: A code of procedure for the construction industry, published by CPIC (www.CPIC.org.uk).

PIX Protocol Guide and Toolkit, published by the Building Centre Trust. Now available from the CPIC website (see above).

Avanti, ICT Collaborative Working: Toolkit documents. Constructing Excellence 2004. Now available from the CPIC website (see above).

Many of the images in this guide are based on those first published in CPIC's *Production Information: A code of procedure for the construction industry* (2003) and BS 1192:2007 documentation or by MR1 Consulting Ltd.

Contents

Preface **xv**

1 Introduction **1**

2 Production information for the construction industry **3**
2.1 Roles and responsibilities 4
2.2 Common Data Environment (CDE) 4
2.3 Standard Method and Procedure (SMP) 5

3 Definitions **7**

4 Roles and responsibilities **13**
4.1 Design Coordination Manager (also known as the Design Manager on some contracts) 13
4.2 Lead Designer 13
4.3 Task Team Manager 14
4.4 Interface Manager 14
4.5 Project Information Manager 14
4.6 CAD Coordinator 14
4.7 CAD Manager 15
4.8 Software versions 16
4.9 CAD checking tools 16

5 The Common Data Environment (CDE) **17**
5.1 Functional sections of the CDE 20
5.1.1 Work-in-progress 20
5.1.2 Shared 24
5.1.3 Published documentation 28
5.1.4 The purpose of the ‘D’ code 29

This is a preview. Click here to purchase the full publication.

5.1.5 Archive 36
5.1.6 The distributed CDE for project and programme 40
5.2 BIM and the Common Data Environment 40

6 Standard Method and Procedure 47
6.1 File naming 47
6.1.1 File identifiers 47
6.1.1.1 Document/drawing descriptor 48
6.1.1.2 Graphic/model file descriptor 48
6.1.1.3 All other documents 49
6.1.2 Field name definitions 50
6.1.2.1 Project 50
6.1.2.2 Originator 51
6.1.2.3 Zone 52
6.1.2.4 Level/location 59
6.1.2.5 File type 60
6.1.2.6 Role codes 60
6.1.2.7 Number 63
6.1.2.8 File-identifier examples 64
6.1.3 File-identifier metadata 65
6.1.3.1 Status 67
6.1.3.2 Revision 67
6.1.3.3 Version 68
6.2 Origin and orientation 68
6.2.1 Coordinates 68
6.2.2 Spatial coordination 69
6.2.3 Building grids 69
6.2.4 Site surveys 70
6.2.5 Alignment of the building to real-world coordinates 70
6.2.6 Example of building alignment 72
6.2.7 Dimensional consistency 72
6.3 Drawing sheet templates 73

This is a preview. Click here to purchase the full publication.

6.3.1 Drawing title block attributes/tags 73
6.3.2 Model title block 74
6.3.3 Drawing sheet sizes 77
6.3.4 Drawing sheet scales 77
6.4 Layer standards 78
6.4.1 Role 78
6.4.2 Element/classification 79
6.4.3 Presentation 79
6.4.4 Description/alias 80
6.4.5 Extract from BS 1192 80
6.5 Annotation 81
6.5.1 Dimensions 82
6.5.2 Abbreviations 82
6.5.3 Symbols 82

7 Specification 85
7.1 Master specification systems 86
7.2 System software 87

8 Implications of design management 89
8.1 Time and resource programming 90
8.2 Approval of information 92

Appendix A Master document index template 95

Appendix B Process maps 97
B.1 Creating a model file 98
B.2 Sharing a model file 99
B.3 Coordinating model files 100
B.4 Transfer of ownership 101
B.5 Creating a drawing rendition 102
B.6 Design team sign-off process 103
B.7 Approval route – stage 2 104
B.8 Approval route – stage 3 105

This is a preview. Click here to purchase the full publication.

Appendix C Consultant's technical systems questionnaire **107**

Appendix D Project team member questionnaire **109**

Appendix E Drawing sheet template **111**

Appendix F Measurements and benefits **115**
F.1 Project results – overview report 115
F.1.1 Introduction 115
F.2 Key measured impacts 116
F.2.1 Investment required 116
F.2.2 Return on investment 116
F.3 Commentary 117
F.3.1 Investment required 117
F.3.2 Return on investment 118
F.3.3 Request for information (RFI) analysis on a single core project 119
F.4 Emerging themes 120
F.4.1 Belief 120
F.4.2 Achieving payback on a single project 120
F.4.3 Fixed, single industry-wide Avanti CDE/SMP or a flexible approach? 121
F.4.4 Model files and their impacts 121
F.4.5 Level of challenge 122
F.4.6 Increase in quality of information 123
F.4.7 Consequential benefits 123
F.4.8 Which projects are most likely to benefit from Avanti? 124
F.4.9 Benefits and risks of a <100 per cent Avanti implementation 124
F.4.10 Need for active, independent support and coaching 125

This is a preview. Click here to purchase the full publication.

Appendix G Abbreviations **127**

Appendix H References and further reading **133**
Standards publications 133
Other publications 134

Appendix I Contact details **135**

This is a preview. Click here to purchase the full publication.

Figures

1: High-level Common Data Environment 18

2: CDE expanded description 22

3: Example work-in-progress architects' models 24

4: Architects' models uploaded for sharing 26

5: Sharing model files 27

6: Coordinating model files 27

7: Uploading structural models 30

8: Architect's removal of duplicate layers 31

9: Concurrent and iterative uploads and downloads 32

10: Creating drawings from shared models 34

11: Status D 37

12: Archive section of the CDE 38

13: CDE in team environment 41

14: CDE in programme environment 42

15: The BIM development process 45

16: Development of iBIM content 46
